

**MORE FROM WOOD.**

This is how you realise your ideas

## **Product News**

Egger Decorative Collection 2020 – 22

The background of the advertisement features several overlapping rectangular panels of different decorative finishes. From left to right, there is a dark blue-grey textured panel, a light beige panel, a dark brown wood-grain panel, and a white panel with grey marble veining. The panels are arranged in a staggered, 3D-like fashion.

**Collection  
extended until  
end 2023**

We are extending the **EGGER Decorative Collection through to the end of 2023**, and giving you even more **planning security** and **design freedom** to realise your ideas thanks to **additional product variants and optimised availability**.

## Upgrade: PerfectSense® Premium Matt and Premium Gloss Lacquered Boards

We have **improved the quality** of our PerfectSense Lacquered Boards. This means that you can now use the matt and high-gloss surfaces for **horizontal applications**. Combined with the well-known anti-fingerprint and antibacterial surface properties, the PerfectSense Lacquered Boards now offer a wide range of benefits for your customers.

### Additional benefits:

- Easier to process
- Enhanced microscratch & scratch resistance
- Food-safety
- Premium Matt (PM) suitable for horizontal applications
- Premium Gloss (PG) suitable for horizontal applications on low use surfaces

## New product: Laminate PerfectSense® Topmatt with coloured core

This new product combines the advantages of a **super-matt**, anti-fingerprint, velvety-warm lacquer surface with those of a **coloured core laminate**. Joint lines and visible edges are minimised, for maximum effect. The lacquered surface, hardened with electron beams, is resistant to wear, impact and scratches.

### Available Decors:

- W1101 PT Solid Alpine White
- U9991 PT Solid Black

## New working principle: Eurodekor® Flammex

New product development means the flame retardant is now integrated into the coating. An intumescent agent within the barrier paper triggers a multistage chemical reaction. This forms a carbon foam layer which has an isolating effect on the wood-based board. You benefit from a wider variety of core boards, and therefore more options for projects.

### **New product features:**

- Thickness increase of 0.6 mm due to multilayer construction on both sides
- Flame retardant property regardless of core board
- Chipboard no longer coloured red
- Classification as B-s2,d0 acc. to EN 13501-1

» Watch the [video](#) to see how it works

» Find more information on [www.egger.com/flammex](http://www.egger.com/flammex)

## New decor offer: Compact worktops

The 12 mm thin and robust compact worktop comes with a bevel milling on the top and bottom of the longitudinal sides. This highlights its modern look as do the perfectly matched core colours.

**There are two new additions to the compact worktops range:**

- F186 ST9 Light Grey Chicago Concrete
- F206 ST9 Black Pietra Grigia
