

**MORE FROM WOOD.**

## Office renovation offers natural working environment

České Budějovice, Czech Republic

This office space pairs form and function beautifully, showcasing Natural Halifax Oak (H1180 ST37) for a natural touch, with Onyx Grey (U960 ST9) and Soft Black (U899 ST9) for modern appeal. Designed with employee well-being and comfort in mind, the 150,000-square-foot, six-story Robert Bosch Technology Center in České Budějovice is home to about 600 employees, and includes testing laboratories, workshops and offices.

The wood-look benches and table in Natural Halifax Oak (H1180 ST37) with light green upholstery provide a natural environment for a relaxing break.

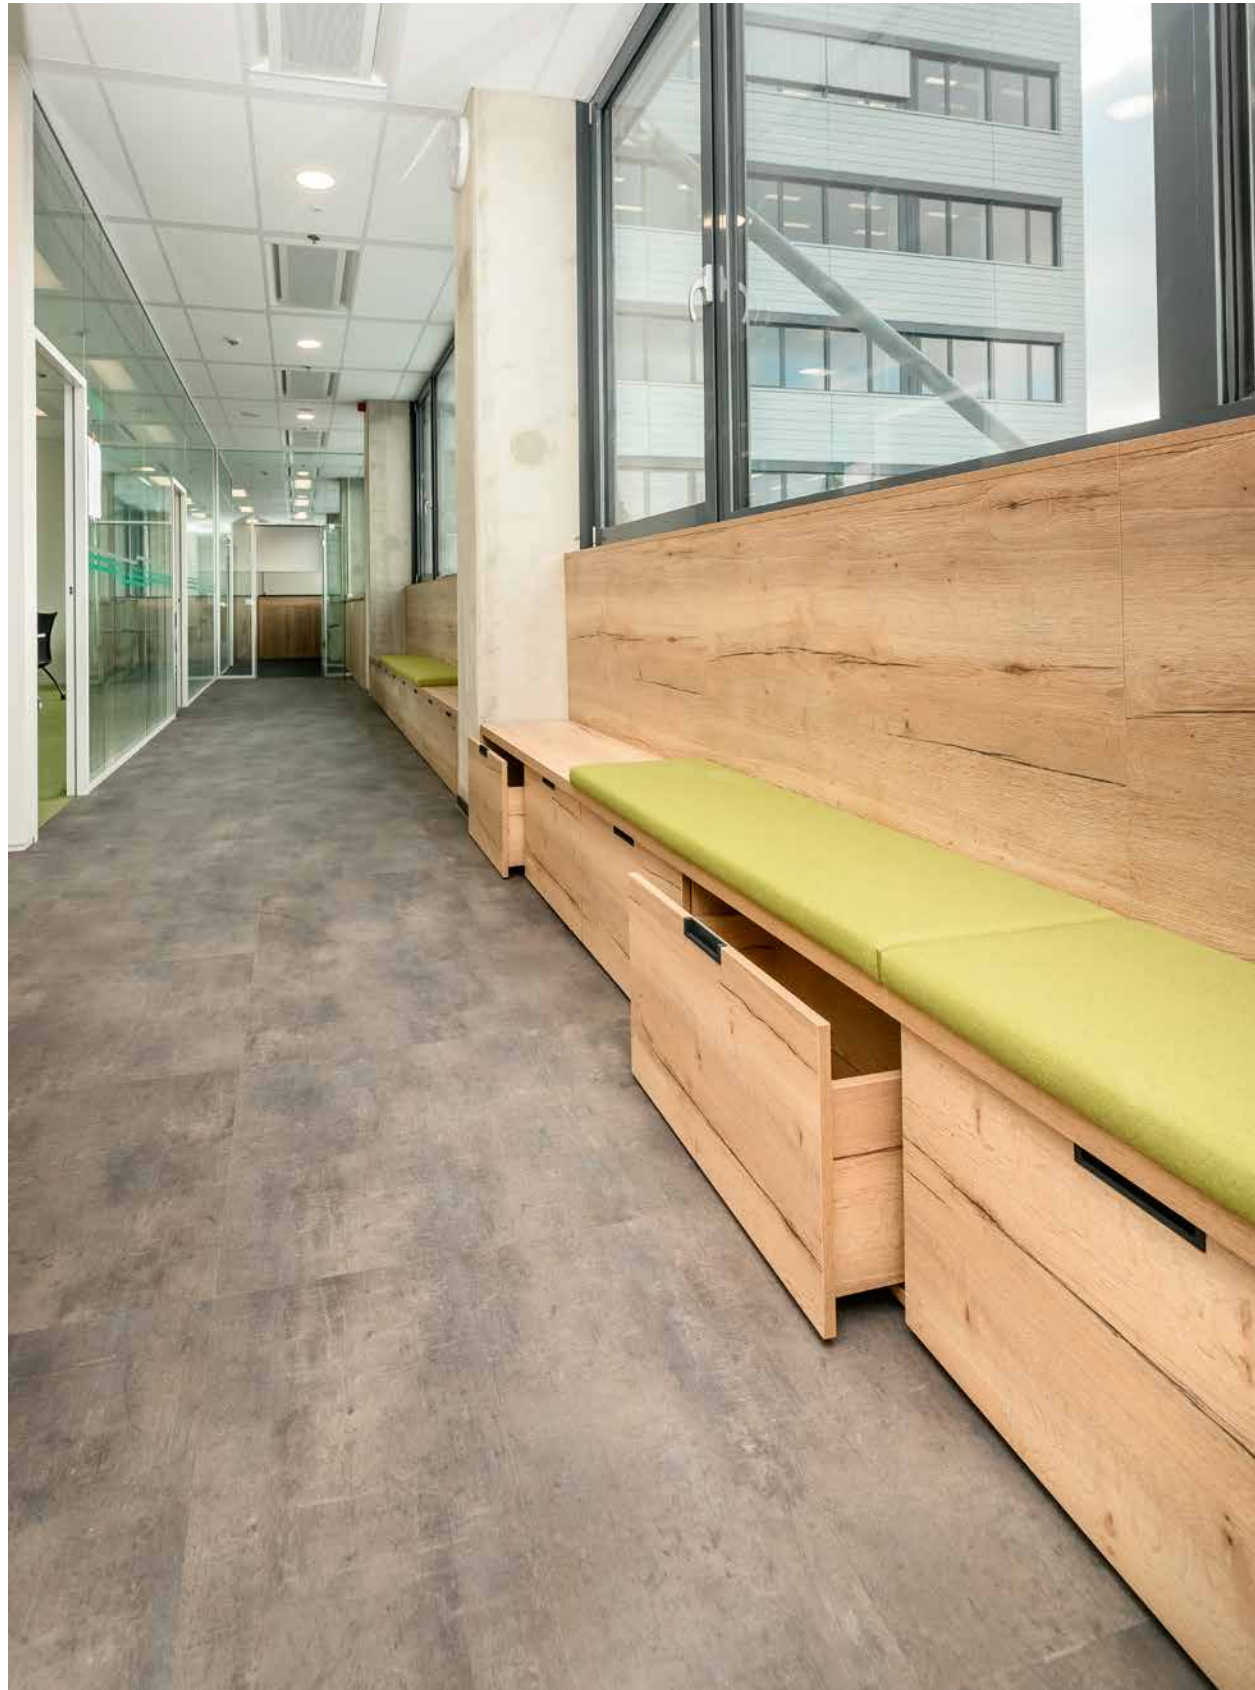

Storage becomes a design element thanks to the use of Natural Halifax Oak (H1180 ST37).

New features include the office furniture and kitchen, as well as upholstered seating elements, chairs and hydroponic planters designed to integrate seamlessly with the furniture. Natural Halifax Oak (H1180 ST37) can be found throughout the space, from kitchen cabinets to multi-functional seating, creating a sense of continuity.

Natural Halifax Oak (H1180 ST37) was used to create multifunctional furniture, which serves as both seating and storage.

Furniture and interior design elements for the project were constructed and installed in just eight months. The end result is a comprehensive office space solution, where employees can enjoy state-of-the-art equipment along with comfort zones, designed for relaxation and an improved working environment.

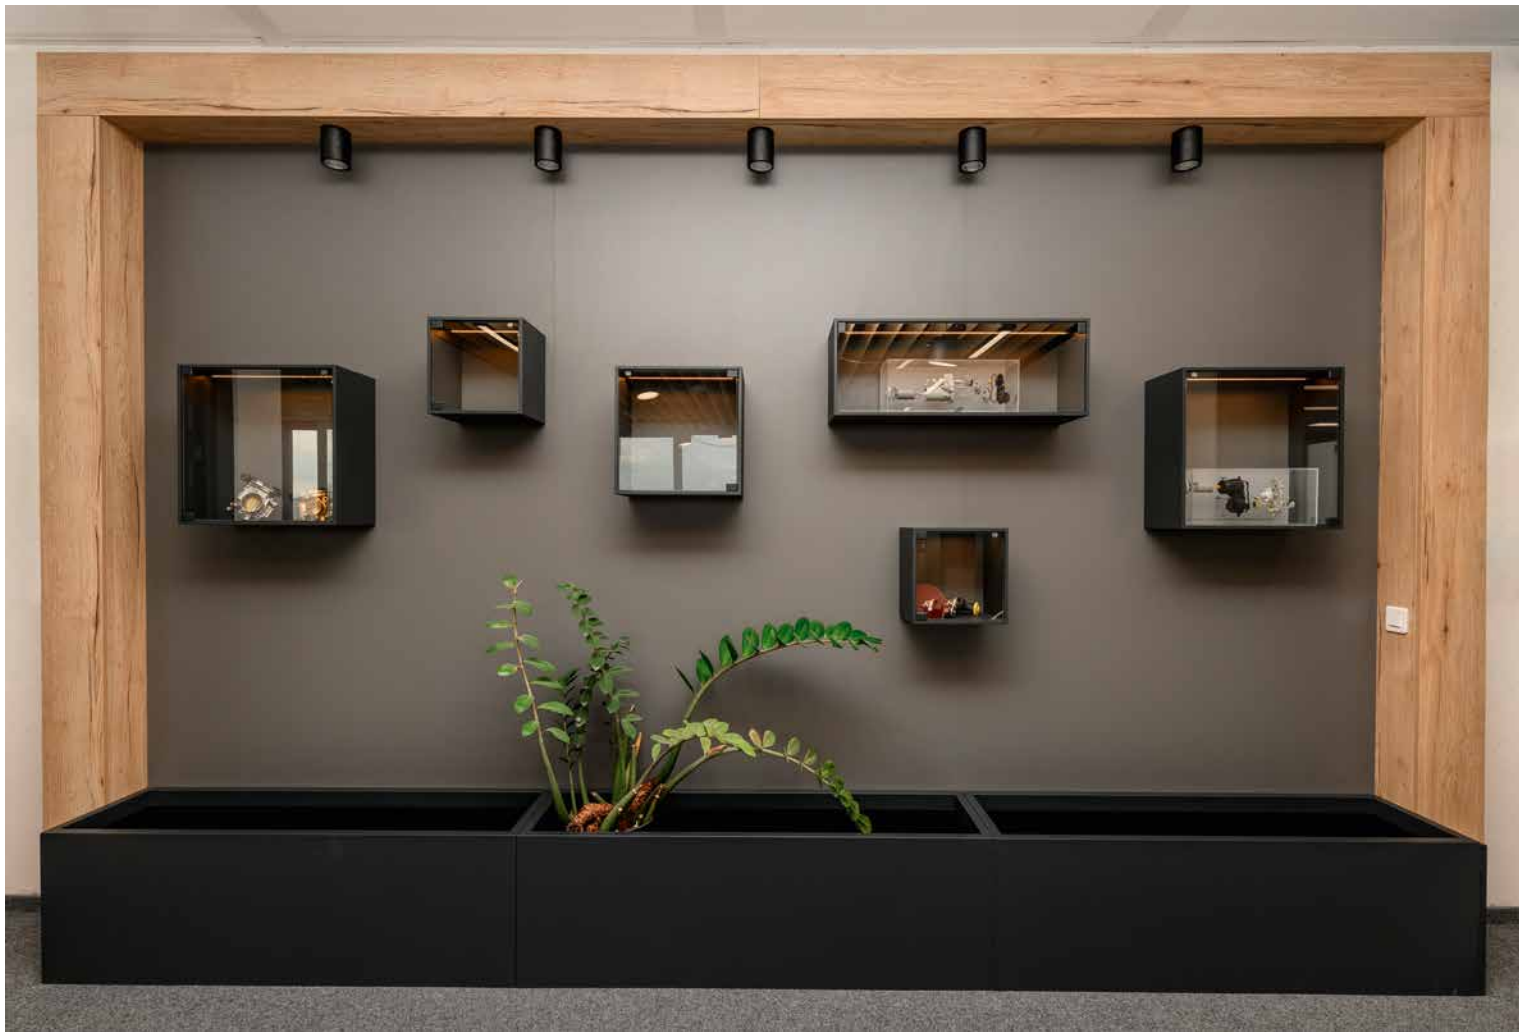

A newly furnished combined dining and kitchen area designed for relaxation, prominently feature the Natural Halifax Oak (H1180 ST37) decor.

The unique, modern and functional interior of the Bosch office premises.

This office design is not only functional, but also highly aesthetic. Sophisticated shelving elements and integrated decorative planters in the Soft Black (U899 ST9) decor improve the working environment.
