Our edging

There are no compromises with EGGER Edging

Seamless furniture or accented designs are created by coordinating the decorative board and edging in terms of colour, texture and gloss level. The large selection of edging in the Decorative Collection 24+ offers solutions for varied design wishes – whether in the same colour and decor or contrasting.

EGGER has the largest range of edging available on the market.

YOUR ADVANTAGES

- EGGER Edging is available in matching decor and texture combinations for all EGGER products, such as Decorative Faced Boards laminates, worktops and the PerfectSense product family.
- For a harmonious overall look, decors, textures and gloss levels are uniform across all products.
- EGGER Edging is available from one roll in a wide range of thicknesses and widths in almost 3,000 variants.
- The edging surface of uni and white colours is lacquered. The additional layer of lacquer ensures greater wear resistance and a harmonised gloss level.
- EGGER Edging is stored in three of our plants for short delivery routes.

ABS Edging

ABS Edging is used to edge coated wood-based materials such as chipboard, MDF and lightweight boards. They offer the right finish for decorative coatings. ABS Edging is available in a wide range of widths and thicknesses. In terms of decor, texture and gloss level, it is matched to the EGGER decors and products.

YOUR ADVANTAGES

- Available in matching decors and textures
- Optically and haptically matched to the respective board decor and texture
- Board and edging from a single source saves time and effort
- Large selection of thicknesses and widths
- Available from stock from one roll

PerfectSense® ABS Edging

Whether matt, matt-textured or high-gloss:
Matching our PerfectSense lacquered boards range, the edging, perfectly coordinated in terms of colour, texture, gloss level and surface resistance, offers the ideal finish for our matt and high-gloss PerfectSense laminates and lacquered boards.

YOUR ADVANTAGES

- Good for fabricators
- Can be optimally combined with PerfectSense lacquered boards and laminates
- Board and edging from a single source saves time and effort

PerfectSense Deepskin Linear Matt

TM12
PerfectSense Omnipore Matt

The components and manufacturing processes for the PerfectSense® lacquered boards, laminates and edging are in sync with each other for a uniform surface. For this reason, the product family is impressive in terms of look, feel, gloss level and anti-fingerprint properties, creating a harmonious overall appearance.

PerfectSense® ABS Edging:

Texture and colour variants
suitable for your project.

Accent Edging

More than ever before, furniture design is focused on combining a variety of materials.

ABS and PMMA Accent Edging in the Decorative Collection 24+ allow you to obtain the most amazing design effects.

Accent edging in combination with uni colours or wood and material reproductions provide creative impulses and allow a multitude of combinations.

YOUR ADVANTAGES

- A combination of various material reproductions
- Realisation of trend designs
- Skilful accent setting

New: The edge thickness of the accent edging has been switched from 1.3 to 1 mm.

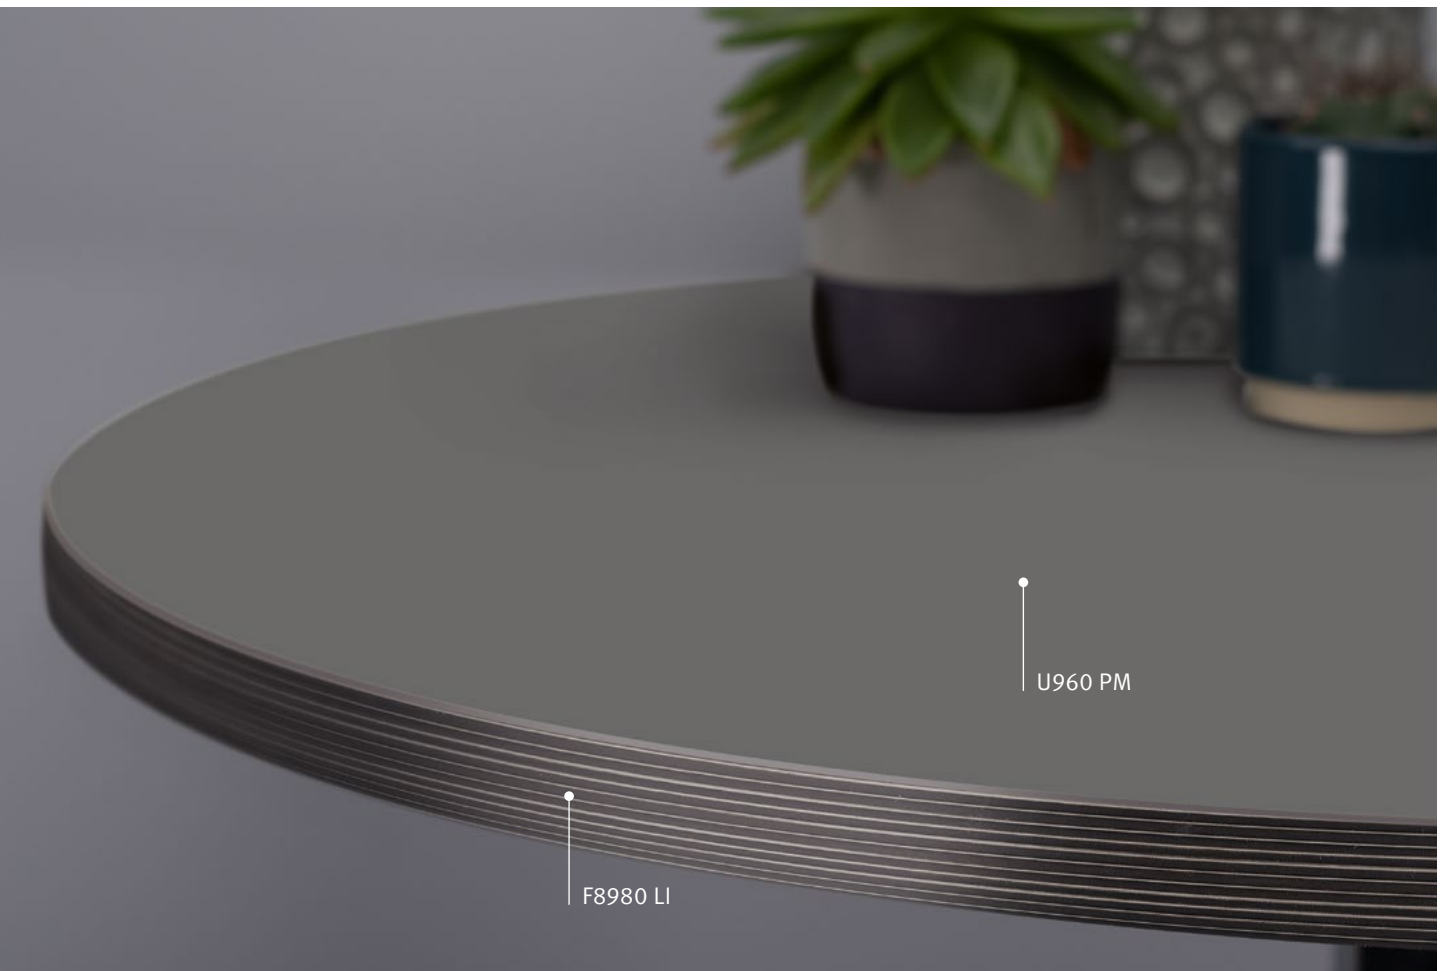

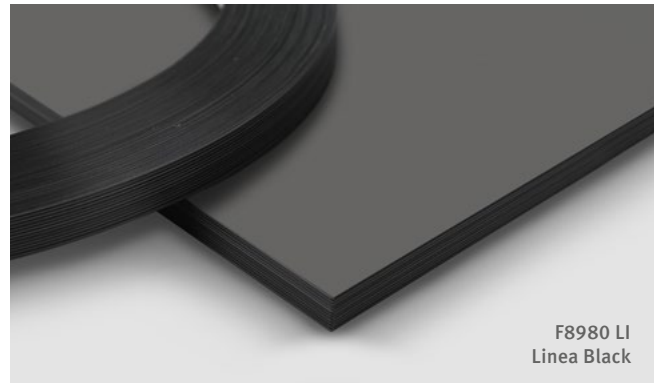

F8930 R2

PMMA Accent Edging

Linea

This edging variant adds a strong graphic accent to many uni colours, wood and material reproductions. It works particularly well with aluminium, black or black wood. Its linear texture also creates a haptic effect.

» Processing instructions and additional information:
to.egger.link/pmma-accent-edging

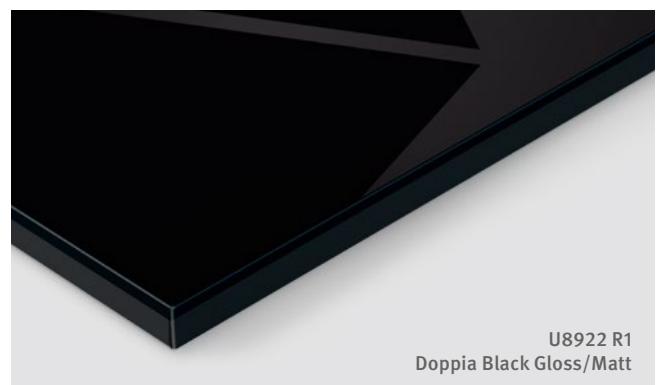

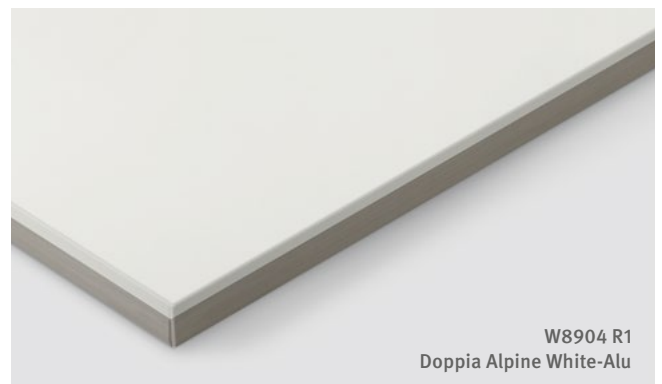

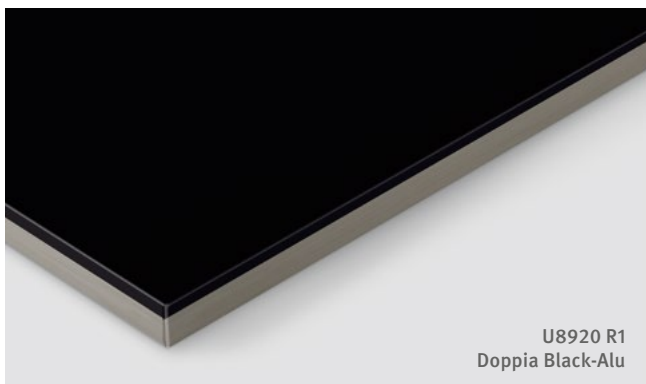

NEW: For better fabrication of the two-tone Doppia edging, the coloured area was widened from 4 to 6 mm.

Dimensions

Width (mm)	23
Thickness (mm)	1.0
lm/roll	75 m

Doppia

Its use turns any piece of furniture into a room's design element. Together with the PerfectSense Premium Matt or Premium Gloss surfaces, this accent edging creates the visual impression of real glass.

ABS Accent Edging

Three-layer

With these special edge designs, the combination of edging and decorative faced board looks like a solid three-layer particleboard. This edging can also be used to create a natural accent in combination with uni colours.

Diamond Brushed

Accent edging impressively conveys how the most amazing visual effect can be obtained with little effort.

Multiplex

Multiplex edging offers the possibility to combine the look of a thin-coated multiplex board with the entire range of our uni colours.

ABS Endgrain Edging

ABS Endgrain Edging highlights the natural effect of the decors. It replicates the look of a log cut across its length with visible annular rings and, in combination with the matching long edge, creates a harmonious overall look.

YOUR ADVANTAGES

- Authentic end-grain look thanks to the reproduction of a log cut across its length with visible annular rings
- Similar to nature's model

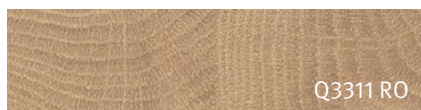

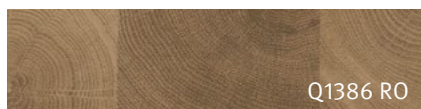

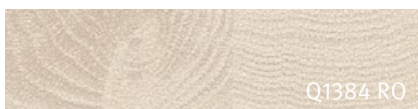

New: The design of the ABS end-grain edging has been updated to give the edging an even more authentic effect. This is achieved by colour-differentiating the individual wooden frames.

Dimensions

Width (mm)	23	43
Thickness (mm)	0.8	1.5

Q1367 RO

Edging in uni and white

For greater resistance to scratches and micro-scratches, the edging is produced in uni and white colours with finish lacquer. In addition to an

optimised gloss level, this gives you higher abrasion resistance and better chemical resistance than conventional uni or white edging.

Painting Grade ABS Edging

Our Painting Grade ABS Edging guarantees the perfect finish, also for lacquered applications. The white base colour is ideal as a neutral foundation for painting in any colour. The ABS edging also offers robust protection. This edging is suitable for painting with solvent-containing paint as well as for many water-based paints.

YOUR ADVANTAGES

- Suitable for individual lacquering
- Can be combined with other paint grade products such as MDF boards or laminate

- Supplier to the furniture industry
- State-of-the-art edging production 4.0
- Production site for PP edging

Calender line in Brilon

Quality control

General information

The EGGER Group

The EGGER Group with headquarters in St. Johann in Tirol ranks among the world's leading wood-based material manufacturers. The family business, founded in 1961, now manufactures in 22 locations in 11 countries worldwide and has more than 11,000 employees. Customers include the furniture industry, specialist timber distributors, as well as DIY markets and DIY stores. Sustainable management is at the core of EGGER's corporate DNA. This has been the case ever since the company was founded, because even back then, wood was far too valuable for Fritz Egger Sr to simply throw it away. In the 2023/2024 financial year, the Group generated consolidated sales of around EUR 4.13 billion and produced 10.4 million m³ of wood-based materials and timber.

EGGER as edging manufacturer

With the takeover of the plant in Gebze (TR) ¹ in 2010, we succeeded, as the only wood-based material manufacturer to date, in making forays in the world of plastic edging. Meanwhile, the plant in Gebze is considered the largest edging production location in the world. In addition, our plant in Brilon (DE) ² makes us the third largest edging manufacturer in the world.

Our focus is on wide-ranging and comprehensive capacity assurance. The use of the latest technologies enables timely and innovative product solutions.
