

MORE FROM WOOD.

EGGER Forestry

A team of forestry experts offering professional harvesting and marketing services to forest owners and agents.

We source wood from sustainably managed forests in North England and Scotland, in compliance with the UK Forestry Standard.

By partnering with us, you are choosing:

- An expert team, experienced in managing all types of harvesting operations
- A tailored approach to meet your requirements
- Services that assist you in your long-term goals.

Our harvesting contractors use state-of-the-art equipment to ensure all operations are safe and efficient.

We're committed to sustainable production practices with a focus on safety, quality and environmental management excellence.

Our parent company EGGER (UK) Ltd uses by-products from the forest and sawmill to produce chipboard panels for the furniture, interior design, and housebuilding industries.
